

Andrey Gritsenko

Senior Unity Developer

gritsenkoandrey.github.io

github.com/gritsenkoandrey

linkedin.com/in/andrey-gritsenko

t.me/fargo1987

Senior Unity Developer with **5+ years** of commercial mobile game development and **10+ years** building high-load IT systems. Designed gameplay mechanics, architecture, analytics & monetization services, and UI/UX for hit mobile games with a combined **366M+ installs**, including Fidget Toys Trading (210M), Snake Run Race (120M) and Zombie Apocalypse (25M) — the latter reaching **\$500K revenue in its first 30 days**. Winner of **Game Jam 2025** — 1st place in 3 categories among 200 teams.

SKILLS

Languages & Platforms

C#, Java, Rust, Python, SQL, Unity 2017–2023 LTS/6, .NET

Dev Tools & Libraries

Zenject, VContainer, Addressables, UniTask, UniRx, DOTween, Job System, Burst, DOTS/Entities, Morpheh, LeoECS, UI Toolkit

Monetization & Analytics

IAP, Firebase, Google Mobile Ads, IronSource, AppLovin, Facebook SDK, GameAnalytics, AppMetrica, AppsFlyer

AI & Automation

Claude Code, Cursor, MCP (Unity MCP + CLI), procedural generation, custom editor tooling, Figma Plugin API

Architecture & Patterns

SOLID, KISS, YAGNI, DRY, ECS, MVC/MVP/MVVM, Clean & Modular Architecture, AI (FSM, Behaviour Tree, Utility AI)

Performance & Graphics

Cross-platform (iOS/Android/PC/Web), Unity Profiler, RenderDoc, URP, Shader Graph, HLSL

Backend & DevOps

PlayFab CBS, Azure Functions, REST API, Docker, PostgreSQL, Android Studio, Xcode, Gradle, Jenkins, Git

Collaboration

Rider, Jira, Confluence, Mentoring, Code Reviews, Technical Documentation, Agile/Scrum

EXPERIENCE

Senior Unity C# Developer — Freeplay LLC (AIBY Group)

Apr 2021 — Present

International game studio, 2B+ downloads worldwide, ~500 employees, top-10 mobile publisher

- Built gameplay mechanics, architecture, analytics & monetization services and UI/UX for hit titles totaling **366M installs** (Fidget Toys Trading 210M, Snake Run Race 120M, Zombie Apocalypse 25M) — the latter reaching **\$500K revenue in its first 30 days** from IAP.
- Designed ECS-based architecture (Entities, Morpheh, DOTS) combined with MV-patterns (MVC/MVP/MVVM) for scalability under growing load; Job System + Burst for compute, Addressables for load times, Zenject/VContainer for DI.
- Built a 7-stage procedural level generator (Python) for a puzzle title — content production sped up **10×**.
- Implemented scalable game AI (FSM, Behaviour Tree, Utility AI) across multiple systems.
- Built custom Unity editor tooling (IMGUI + UI Toolkit) so artists/designers could author content independently — **2× faster** content creation.
- Standardized an internal analytics/ads SDK (GameAnalytics, AppMetrica, AppsFlyer, Firebase, IronSource, AppLovin, Appodeal, Facebook SDK) — new-project bootstrap time cut by **50%**.
- Profiled and optimized custom HLSL/Shader Graph shaders using Unity Profiler, Frame Debugger, RenderDoc.
- Shipped a GDPR-compliant CMP consent form adopted as a company-wide standard.
- Designed a cloud backend for social features (leaderboards, clans, chat, saves, auth) on PlayFab CBS, Azure Functions, .NET — lifted retention by **25%**.
- Built a Figma batch-export tool (Unity Editor tool + Figma plugin) that doubles as a smoke test catching broken level configs before build.

Unity C# Developer — GeekBrains (VK Group)

Nov 2019 — Jan 2021

Russia's largest online IT-education platform

- Designed reference architecture templates (MVC, MVP, MVVM, ECS) for student projects — cut time-to-first-playable-build by **25%**.
- Built interactive learning projects for iOS/Android covering UNet multiplayer, URP, DOTween, Addressables, ScriptableObjects and native plugins.
- Mentored **10+ students** with weekly code reviews on SOLID, OOP and Git-flow.

Data Analyst — Federal Customs Service

Jul 2010 — Apr 2021

Large government agency, high-load distributed IT infrastructure, ~2000 employees

- Optimized SQL queries and Oracle Database configuration for high-load services — cut average response time by **20%**.
- Built an analytics system on CronosPro (Lua scripting), rolled out to 8 regional divisions.
- Ensured database resilience via monitoring, replication and backups — **99.9% uptime** on critical systems.

Game Jam 2025 🏆

Mar 2025

Team of 4, among 200 teams

- Our game won **1st place in 3 categories**, including "Best Game." Worked on game design, mechanics, gameplay logic, shaders and UI/UX.

SHIPPED GAMES

Fidget Toys Trading	★4.5 · 100M+	Snake Run Race 3D	★4.6 · 50M+	Zombie Apocalypse	★4.6 · 10M+
Hole Puzzle	★4.8 · 1M+	Idle Cutter: Wood Slice	★4.6 · 1M+	Shooting Tower	★4.4 · 5M+

EDUCATION & COURSES

Moscow Financial and Industrial Academy

Bachelor's Degree, Management

English — B2

- **2025** — Unity Game Development: ECS Approach to Gameplay
- **2025** — Masterclass: Addressables for Distributed Game Resources
- **2022** — Masterclass: Artificial Intelligence in Games
- **2021** — Master the Fundamentals of Game Development with Unity
- **2021** — Architecture Unity Games
- **2019** — Unity Developer Program
